NEW GAS ANALYZER MEASURES TWO GASES AT ONCE!

Low-cost and Reliable Dual Gas Analyzer from Sensor Electronics Provides Alternative to Gas Chromatography

Sensor Electronics, Minneapolis, MN, has recently released the SEC DIR Dual Gas Analyzer designed to measure two gases simultaneously in a process environment.

The SEC DIR Dual Gas Analyzer can sense Water, Vapor, CO₂, Hydrocarbons, Ethylene Oxide and many more. Applications for the SEC DIR Dual Gas Analyzer vary from pipelines, to sterilization chambers, to deep vacuum processes. Features of the SEC DIR Dual Gas Analyzer include:

- Explosion Proof
- Self-correcting – works for years without any recalibration or adjustment
- Operates over temperature, RH, pressure extremes
- Self diagnosing fail-safe design advises user of operating status
- Patented infrared, optical sensing technology
- A low cost and reliable alternative to gas chromatograph for process control applications.

Sensor Electronics has many other gas detection products available – see our website at www.sensorelectronics.com or call us at 1-800-285-3651 for more information.
